

EasiLinc.

PROTECTION AND INTEGRATION MADE SIMPLE

The Event Analysis Warranty Only from POWER Engineers

For the period of one (1) year from the installation of any new EasiLinc Product, POWER Engineers will review and report on event, history, and SER data created by those new relays or devices free of charge. Simply transmit event data that you wish to have reviewed to POWER Engineers by e-mail, along with your contact information and any other pertinent facts. We will review the data and submit a full report, along with any suggestions for performance enhancements.

To initiate a review, email your event data to easilinc@powereng.com. We are happy to offer one more way to make protection and integration simple for you.
